Personal statement

A professional and experienced digital designer with a passion for creativity with extensive knowledge in User Interface Design, Mobile and Web Development and User Experience, currently working as a senior web designer team lead for a QHSE software company. A highly organised and efficient individual, whose thorough and precise approach to projects has yielded peers recognition and award-winning achievements in previous academic years.

Key Skills

- Extensive knowledge and proficiency in User Interface Design and prototyping
- Knowledge and proficiency in UX, including usability testing, market analysis and user behaviour
- Knowledge and proficiency in Web Development Languages (HTML5, CSS3, JavaScript, jQuery) including extended exposure to C# (Umbraco)
- Proficiency in all areas of Adobe Creative Suite (XD, Photoshop, Illustrator, Premiere, After Effects...)
- Extended knowledge of version control (Git, Bitbucket)
- Excellent communication skills, both written and verbal in English and French
- Extended experience of IT hardware and software support at various levels both on field and remotely

Employment History

Senior Web Designer – Team Lead – Ideagen PLC, Glasgow

(January 2021 – Present)

- Oversee the technical management and development of Ideagen's websites
- Create, design, wireframe, and build digital solutions, webpages, tools, and user experiences using front-end web development programming
- Support the development of the website strategy and roadmap to help us achieve our company vision and digital marketing objectives
- Lead all web design related tasks across both digital and wider business projects to collaborate with stakeholders and ensure that web design, development, UX and UI have been considered

- Lead on website conversion rate optimisation and personalisation within the digital team, running tests and making design/UX improvements to pages to increase traffic and lead conversion
- Champion and instil data-driven and user experience decisions for marketing activities and initiatives by proactively thinking about the end user, mapping out user experience journeys and the impact/benefit and rationale for any web design and development decisions made
